Engineering

Index to Volume 213

JANUARY TO DECEMBER 1973 NUMBERS 1 TO 12

PAGINATION

January	1–52
February	53–104
March	105–192
April	193–272
May	273–376
June	377–464
July/August	465–576
September	577–672
October	673–760
November	761–856
December	857–924

FEATURE INDEX

A

ABS-San resin blends, New 497
Abrasive, Coated 881
Accountants and Engineers, 31
Acoustic foam, 499
Actuators, Metric rotary, 214
Additive, Combustion, 882
Adhesives, 632
Advances in adhesives, 494
Aerosol cleaner spray, 123
After Apollo, what next? 237
Air
—Send it by, 809
—bearing load mover, 214
—cooled compressors, 405
Allegro—sweet music, 408
Amazon, HMS, 699
Analysis
—of large static antenna structures, 226, 308
Angle nut runners, 613
Antenna
—analysis of structures, 226, 308
Anti-reflection coated sheet glass, 402
Are designers ready for Europe? 298
As she is spoke, 206
Automatic
—cleaning of hypodermics, 622
—drawing, 395
—self piercing nuts, 210
Automatics go electronic, 792
Automation kit, 292

B

Bags for packaging, 67
Balls, Coloured polystyrene 292
Batteries, Better, 878
Battery cases, 395
Bearings
—Aero-space, 617
—material, New, 499
—Those Japanese, 821
Bellows, Time to standardize 129
Benefits of MBO, 317
Bevel protractor, 613
Block carrier, 210
Braking
—DC injection, 499
—Instant, 609
Brazing, Mild steel components by furnace, 525
Bridging the gap, 699
Broaching machine, Continuous 206

C

Calculator for the blind, 491
Camera
—DIYCCTV, 707
—instant picture, 218
Camshafts, Variable profile, 610
Car
—obstruction solution, 206
—of the future, 712
Carbon resins, New, 407
Card houses are quick, 487
Cartons by phone, 217
Case for Gallic logic, 229
Casting–market forces, 339
Castors, 118
Catalytic heating panel 292
Caught in the act, 435
Ceramic fibre, 399
Chain hoist, Metric, 292
Channel Bridge, 396
Chemical engineering, A venture in, 714
Choosing the right clutch, 426
Circular slide rule, 210
Clean
—air conference 1973, 295
—coal gas, 493
Cleaner spray, Aerosol, 123
Close to form forgings, 135
Clutch, Choosing the right, 426
Coal
—Has it a future? 38
—to the rescue! 297
Coating
—for PC boards, 290
—wear resistant, 292
Colourpen, New, 499
Coloured polystyrene balls, 292
Competition
—corner (making golf balls), 286, 914
Component counter provides output signals, 405
Compressed air
—is it dry enough? 745
—tunneller, 67
Compressor
—air cooled, 405
—oils, New 214
—Rotary design, 209
Computing stresses in the base frames of lorries, 802
Concrete, Revibrated. 141
Conditions right for UK exports? 118
Conference
—Accountants and Engineers, 31
—Instant image in industry, 27
Connections, Co-axial, 706
Continuous broaching machine 206
Controller, Sequential, 292
Controlling gravity discharge, 420
Conveyors, 639, 715
—Avoiding resonance in vibratory, 895
—for powders, 210
—self-powered document, 609
Could it really happen? Energy machining a casting, 524
Co-ordinate
—measuring, 610
—table, 209
Cost effective metal casting, 538
Couplings
—ease hydraulic assemblies, 500
—pipe, 22
—shaft, 499
—snap fit, 792
—universal shaft, 89
Credibility gap, 118
Creep
—rupture behaviour, New method for estimating, 535
—testing and engineering design, 441
Crisis in mass production, 419

D

DIYCCTV, 707
Data
—collection, the need for, 421
—Rejecting suspect, 817
Deflated safety, 487
Design Council
—and Engineering, 873
—why it has bought *Engineering* 697
Design does not stop at the drawing board, 415
Designers guide (hydraulics, electrics, electronics), 494
Desks, working, 401
Die grinders, 613
Diesel engine, Industrial, 792
Digital thickness gauge, 613
Difficulties of producing nothing, The, 222
Display, Electrochromic with memory, 707
Disused mine to store crude oil, 497
Diver – return of the iron man, 560
Document conveyor, 609
Dolomite Sprint, 506
Draughting machine, High speed, 882
Draughtsmen can improve design, 891
Drawing, Automatic, 395
Drill
—IC Rock, 11
—new heavy duty, 290
Drives, Infinitely variable speed, 292
Driving through a wall, 493
Drum reconditioning, 440
Dynamic measurement of system positional deviations, 519

E

Earmuffs, 613
Earthmover, Fiat, 699
Edge guiding with fluidics, 210
Electrification, Great Northern, 416
Electrohydraulic servo-valve, 427
Electron beam weld, 12
Electronic timer, 493
Emergency lighting, The need for, 306
Energy envelope machining and casting, 524
Engine, New V8, 401
Engineering
—design, Those trade figures and, 785
—expertise in DoE, 399
—in India, 41
—in Wales, 904

Engineers
—and accountants, 74, 140, 239
—loss of status? 251
Entrepreneural spirit, The, 488
Environment 74, 700
Environmental
—crisis, 885
—road, 64
Europe, are designers ready for, 298
Exhaust emission – ion exchange solves problem, 706
Extrusion takes the bump, 879

F
Factory
—a health farm, 630
—tricycle, 292
Failsafe electrical brake, 879
Failure detection, 878
Fastening composite materials, 217
Felixstowe's freight moves off, 21
Filler metal, 290
Film pack, 68
Fire
—alarm kit, 493
—protection in computer establishments, 64
—retardant resins, 405
Flammability, Measuring, 402
Flexible
—powder conveyor, 210
—working hours, 488
Flooring, Open grill in aluminium, 705
Fluidics
—Edge guiding, 210
—in Japan, 83
Fluoro-carbon resins, 407
Ford truck range, 699
Forging manipulation, Largest, 538
Forgings, Close to form, 135
Foundry of the future, 133
Freight, Felixstowe's moves off, 21

G
Gearbox, Fixed ratio rolling friction, 705
Gearboxes, accelerated bench tests, 724
Generator, Thermoelectric, 882
Genesys, 121
Glass
—drilling, Small hole, 292
—Shatter proof film coating for, 707
Glasses, One piece moulded, 704
Gold plating improves weldability, 499
Graticules, Precision, 707
Great Northern electrification, 416
Group of many parts, 518
Guide
—to hydraulics/electrics/electronics, 494
—vane stator ring, 117

H
Handbooks, Industrial, 790
Handling ship sections, 290
Happy threading, 67
Has
—coal a future, 38
—the Wankel a future? 303
Headlamp conversion, 603
Health screening, 604
Heat
—pipes, 401, 909
—pipes—finned, 881
Heating pump regulator, 880
High temperature plastics, 230
Hoist, Electric chain, 229
Holograms, 68
Holography camera, 401
Hovercraft, All-purpose, 505
How
—clean is clean? 295
—good is your engineering organization? 28
Humber bridge, 301
Hypodermics, Automatic cleaning of, 622

I
IC Rock drill, 11
Idea, £1 000 reward for a good, 402
Improving mechanical strength, 487
Indicator, Temperature, 292
Industrial
—risk audit, 8
—robot technology, 290
Industry in Israel, 314
Infinitely variable speed drives
Information systems for designers, 819
Infra-red
—heater is oil fired, 401
—thermometers, 44
Injection moulding
—research, 402
—Technique for, 499
Innovation
—or stagnation? Prospects for railways—Part 2, 17
—always good for us? Is technical, 413
Instant
—image, 533
—image in industry 27, 87, 134, 255, 337
—photography improves company communications, 70
Insulation, New high temperature asbestos free, 399
Inventions, Homeless, 709
Inventory control, 529

J
Japanese
—fluidics, 83
—smoothness (Mazda car), 396

K
Know your steel, 515

L
Lamp
—27 lights from one, 705
—costs, 880
—metal halide, 405
—old for new, 603
Lancia's new Beta, 631
Lasers
—and Tokamaks, 396
—Take to the air, 117
Lead in petrol—a legacy from two chemical engineers, 139
Leak proof windscreen, 289
Level indicator for portable drills, 121
Linear
—actuator with signalling switches, 68
—motor addition to recorder range, 405
—position-measuring system, 11
Liquid crystal wave guides, 877
Lock bush for pulleys, 499
Loco prints, 206
Logic arrays, Uncommitted, 209
Looking at 1977, 878
Low
—cost NC turning, 285
—cost pulley block, 285
Lubricant, Synthesized hydrocarbons for new, 526
Lunar base structures, 509
Lusty U-bender, 217

M
MBO, Benefits of, 317
Machine punch with quick-change tooling, 205
Magnets, Better permanent, 497
Making management interesting, 206
Management into motion, Putting, 604
Maplin
—consultative document, 700
—model in action, 263
Marching into Europe, 790
Market
—dynamics, the key, 283
—forces are closing engineer-founder gap, 339
Marking kit, Portable electric, 881
Marine propellers, 523
Materials technology in the Open University, 901
Mazda
—estate car, 396
—rotary engined car, 221
Measuring
—flammability, 402
—system, Linear position, 11
—the earth's drift, 205
Metal halide lamps, 405
Meters, Panel, 613
Metric
—a weighty problem, 823
—chain hoist, 292
—milestone (?), 396
—tube fittings, 86
Micromanipulator, no backlash, 292
Microscope, modular, 607
Microswitch with unique cleaning action, 290
Mild steel components by furnace brazing, 525
Minicomputer systems, 413
Mini loader, 123
Mist cooling system, 292
Modular microscope, 607
Module film pack, 68
More Japanese smoothness, 396
Motor
—controls, 613
—PAM induction, 705
— -wound flat, 292
Moulds, Adjustable, 499
Mouldings—nylon fibre, 292
Museum of Technology, 64

N
NC
—by thumb switch, 493
—Turning-low cost, 285
Need
—for data collection, 421
—for emergency lighting, 306
Negative rate springs, 214
New
—compressor oils, 214
—concept for high pressure pump, 491
—concept in setting and measuring verticals, 401
—defence supply quality requirement, 402
—dialling mechanism, 205
—fluoro-carbon resins, 407
—heavy duty drill, 290
—high temperature asbestos free insulation, 399
—metric rotary actuators, 214
—process improves plastics furniture, 615
—type of folded radiator for cars, 117
—type of radiator for cars, 117
—V8 engine, 401
No
—achievements? 286
—backlash micromanipulator, 292
Noise, Predicting motorway, 703
North sea oil and gas, What potential for UK? 149
Nuts, Automatic self piercing, 210
Nylon
—fibre mouldings, 292
—woodscrews, 214

O
Oil
—disused mine to store crude, 497
—for rotary IC engines, 705
—gets the message, 604
—New compressor, 214
Operational research, 626
Organization? How good is your engineering, 28
Oscillatory metal working, 243
Output signals-component counter provides, 405
Outsize pulverizer, 68

P

Paging, Urban, 494
Paint regulations, 435
Parts, how industry can use them effectively, 729
Personal service, 123
Petrol engine design—optimizing, 896
Peugeot
—104 Saloon, 516
—small car, 399
Phone on the counter, 700
Photoresist, removing, 123
Physics exhibition, 703
Piles, Concrete, 877
Piling, Silent, 205
Pins, Tamper-proof self retaining, 607
Pipe
—bender, 217
—fittings—metric, 86
—couplings, 22
Planned innovation—Denco Miller secret, 527
Planoscope, The, 405
Plasma cutter uses compressed air, 792
Plastics
—chamois, 67
—for car bodies, 32
—furniture, New process improves, 615
—for the engineer, 545
—high temperature, 230
—ship, Largest, 603
Plate magnets, 613
Plumbing in stainless steel, 878
Pneumatic control, 493
Polymer properties, 411
Ports, how industry can use effectively, 729
Position-measuring system, Linear, 11
Power
—pack, rotary engined, 880
—press gives top milage, 791
—washers, 613
Press feeder, 292
Price of power, 537
Prize is fifty million, The, 64
Process time monitor, 214
Professional engineers, 286
Prospects for railways, 175
Protecting process plant, 333
Publicity package, 217
Pulley block—low cost, 285
Pulverizer, Outsize, 68
Pump
—new concept for high pressure, 491
—non-metallic, 613
—/regulation—central heating, 880
—works off the airline, 420
Put it in paper, 67

Q

Quality
—of working life, 703
—requirement—new defence supply, 402
Quiet (Planning and noise), 286

R

Radiator for cars, New type of, 117
Railways, Innovation or stagnation, 17
Recent developments in oscillatory metal working, 243
Recharging the battery industry, 488
Recycling, The role of, 628
Remote security lock, 121
Removing photoresist, 123
Research link-up, 286
Resin bonded cylinder, 603
Resins-fire retardant, 405
Resonance in vibratory conveyors, Avoiding, 895
Retirement plan for engineers, 34
Return of the iron man, 560
Reverse osmosis, 68
Revibrated concrete, 141
Reward, £1000 for a good idea, 402
Road and rail links, 700
Robot technology—industrial, 290
Rotary
—design air compressor, 209
—luxury, 221
—shaft oil seal, 561
Russian power, 604
Rust, A non-problem? 321

S

Screening printed circuit boards, 117
Sea is not the place, The, 393
Seal design—advanced thinking in oil, 797
Seals for rotating shafts, 550
Security, 8
Seduced by Celica, 657
Selection by sight, 68
Separating slit strip and foil, 131
Sequential
—controller, 292
—timer, 292
Setting and measuring verticals, New concept in, 401
Sewage,
—in the sea, 393
—pollution, War on, 395
Shaft couplings—universal, 89
Ship
—model investigation for restricted navigations, 78
—sections, Handling, 290
Signalling—Euston to Glasgow, 727
Silent
—air, 425
—Piling, 205
Simulated space, 395
Skylab—a spaceborne materials laboratory, 810
Slide rule, Circular, 210
Small-hole glass drilling, 292
Soldering on to magnesium, 67
Spacecraft after Apollo, 237
Space engineering, A new look for, 319
Sperry Vickers European Group (Company Profile), 311
Spraying by acoustic energy, 705
Spring balancers, 613
Springs, Negative rate, 214
Stainless
—steel, 286
—steel, Coloured, 607
Standards going international, 703
Standby for natural gas compressors, 402
Stars and sickle, 604
Steel
—Know your, 515
—Making viable, 820
—putty, 613
Steels that stay put, 75
Sterile enclosures, Engineering of, 913
Stock from swarf, 814
Student exchange (As she is spoke), 206
Subminiature switches for printed circuits, 402
Sun glasses Polaroid, 218
Sweeper, Fork lift, 704
Switch, time supply, 613
Switches for printed circuits, Subminiature, 402

T

Taking out the glare, 218
Tapping unit, 67
Taxation allowances for machinery and plant, 628
Teaching materials technology, 417
Technical innovation, is it always good for us? 413
Technology and safety, 161
Telephone with a memory, 399
Telephones—new dialling mechanism, 205
Temperature
—gun, 699
—indicator, 292
That bridge, 396
Thermoelectric generator, 882
Thermometers, infra-red, 44
Thermoplastics replace metals, 285
Thread rolling dies, 499
Three into one equals increased profitability, 440
Thyristors, light sensitive, 704
Ticket machine, Sophisticated, 706
Time to standardize, 129
Timed deep hole unit, 292
Timer
—electronic, 493
—pneumatic, 609
—sequential, 292
Tomorrow's small cars, The first of, 516
Tools for underwater work, 487
Top engineers can save money for their company, 218
Tornadoes, Design for, 623
Total
—mobility tyre, 126
—technology, 64, 911
Tower of Babel, 8
Town & Country buggy, 121
Toyota
—Celica, 657
—service, 877
Traffic safety barrier, 205
Tramcar, elegant solution to urban transport, 799
Transport 2000, 115
Trials of tribology, 286
Train, Swedish high speed, 703
Training priorities, 203
Tribology, Trials of, 286
Tricycle-factory, 292
Truck locks, 706
Tubular water tanks, 613
Tunnelling machine, 67
Tyres
—total mobility, 487
—under test, 123

U

Ultrasonics challenge X-rays, 880
Universal joints, 89
Uncommitted logic arrays, 209
Undersea survey, Vehicle for, 285
Underwater work, 487
Unique rotary design air compressor, 209
Unwrap tool, 613

V

VTOL and the third London airport, 619
Vacuum
—cleaner, 613
—identification, 222
—pumps use Wankel principle, 121
Valves controlling gravity discharge, 420
Variable speed belt drive, 210
Vehicle for undersea survey, 285
Vibration controls levels, 499
Video cartridge recorders, 610
Visual recognition by machine, 68

W

Wankel—has it a future? 303
War on sewage pollution, 395
Watch your water, 286
Water
—For corrosion-free boiler use the right, 805
—treatment, 707
—treatment—problems of metal finishing, 520
—vapour measurement, 146
—Watch your, 286
—water everywhere, (Viewpoint), 485
Wear resistant coating, 292
Weighing trucks for safety, 289
Weld, 8in electron beam, 12
Welding a beetle, 395
What price the engineer? 601
Windings—improving mechanical strength, 487
Why wire? 64
Windscreen, Leak proof, 289
Woodscrews, Nylon, 214
Working desks, 401
Wound flat motor, 292
